Appl. No. 09/706,318

ABSTRACT

The present invention relates to contact lens solutions employing imidazole as an additive. Lenses treated with these solutions have improved resistance to protein and other polymeric depositions. The addition of imidazole to the solutions decreases the denaturalization of proteins during the cleaning cycles, and coats treated lenses to decrease the number of active binding sites.

In the event that Applicants have overlooked the need for an extension of time, additional extension of time, payment of fee, or additional payment of fee, Applicants hereby conditionally petition therefore and authorize that any changes be made to Deposit Account No.: 50-3010.

Respectfully submitted,

HISCOCK & BARCLAY, LLP
